

Why Wooddees™?

The finest musical instruments have always been made from wood. Like a finely-tuned piano or the best acoustic guitars, WOODDEES™ from iConnects deliver pure and natural listening pleasure.

Wood sounds amazing—nothing beats its deep bass, rich range of sound and inherent low resonance. And for your money, nothing beats WOODDEES™. These natural wood earphones bring out a dense, polished listening experience from your mp3/4 player. And at about half the price of comparable high-end earphones, you're getting the best sound at the best price.

Give your ears a pair today.

FEATURES

Natural Wood Housing - Wood Sounds Richer! Old world natural wood is the choice of audiophiles and sound professionals

Proprietary Designed Loudspeaker - Latest high technology designed transducer (loudspeaker) for deep bass performance and full range timbre with the perfect balance between performance and sonic excellence

High Strength Neodymium Magnet - Compact, high magnetic strength design produces higher sensitivities for distortion-free high volume levels

Sound Isolating Ear Buds - Four different soft silicon ear bud sizes offers the listener the ultimate match in sound isolating performance

Tangle Free Cable - Soft urethane rubber outer cable jacket ensures durability, improved flexibility and tangle free management

Multi-Strand Oxygen-Free Copper Construction - Ensures the widest frequency response and lowest resistance

24k Gold Connections - Offers maximum signal transfer with corrosion resistance

Comfort Slide - For a secure fit, slide the adjustment block up and down to adjust the slack of the cables leading to the earphones.

Woodees™
