Factory Audio System T-harness

F.A.S.T.

Factory Audio System T-harness

Would you increase your profits, reduce your inventory overhead, reduce comebacks, and increase store traffic and sales if you could?

OF COURSE, YOU WOULD! But how? The F.A.S.T. System from Bazooka Mobile Audio can help you do all of that and more.

Time is money!

At Bazooka, we recognize that the best route to increased sales and profits is by turning cars in and out of your shop in the fastest, most reliable way possible. To that end, we are introducing our Factory Auto Sound T-Harness system (F.A.S.T.)

What is F.A.S.T.?

F.A.S.T. is installing a Bass Tube in most cars in under 30 minutes. F.A.S.T. is getting the car back to your customer quicker. F.A.S.T. is doing car dealership and fleet jobs right the first time, every time. F.A.S.T. is profit from increased opportunities. F.A.S.T. is the way to build big profits in 2005! F.A.S.T. is the key to multiple applications with minimum inventory commitment! F.A.S.T. is the innovative T-harness system that allows you to integrate the vast majority of OE systems out there.

How does it work?

In a word, simple. First, choose the Adapter plug(s) to fit your application(s). If you do work for multiple dealerships, choose a SKU mix that makes sense to your business. To minimize inventory overhead, purchase only the extension harnesses for your current Bazooka inventory. At install time, grab the adapter for the car you are working on, one extension cable, and one Bazooka, and get to it. The typical install takes about 25 minutes, but, if you are familiar with the car already, install times of less than 15 minutes are NOT uncommon!
