

BPB24 / BPB24-DS or BPB36 Installation Instructions

End Mounting Options with Cast Aluminum Legs

See Warning Below!

Use the 8mm X 12mm bolts (5) to attach the mounting legs. Mounting legs (3) can be installed in either direction depending on space constraints. When mounting with optional clamps (PR-URM, PR-FRC200, and PR-FRC175) use the hex bolts provided with the clamps to mount the bottom half of the clamps to the mounting legs.

Warning:

If you are using the cast aluminum mounting legs to secure the Party Bar to your machine, the mounting legs must FIRST be attached and tightened to the Party Bar before mounting it to your machine. Attaching the legs to the machine first and then inserting the Party Bar between them can cause misalignment, spacing, and torque issues that can cause damage to the mounting assembly resulting in a failure.

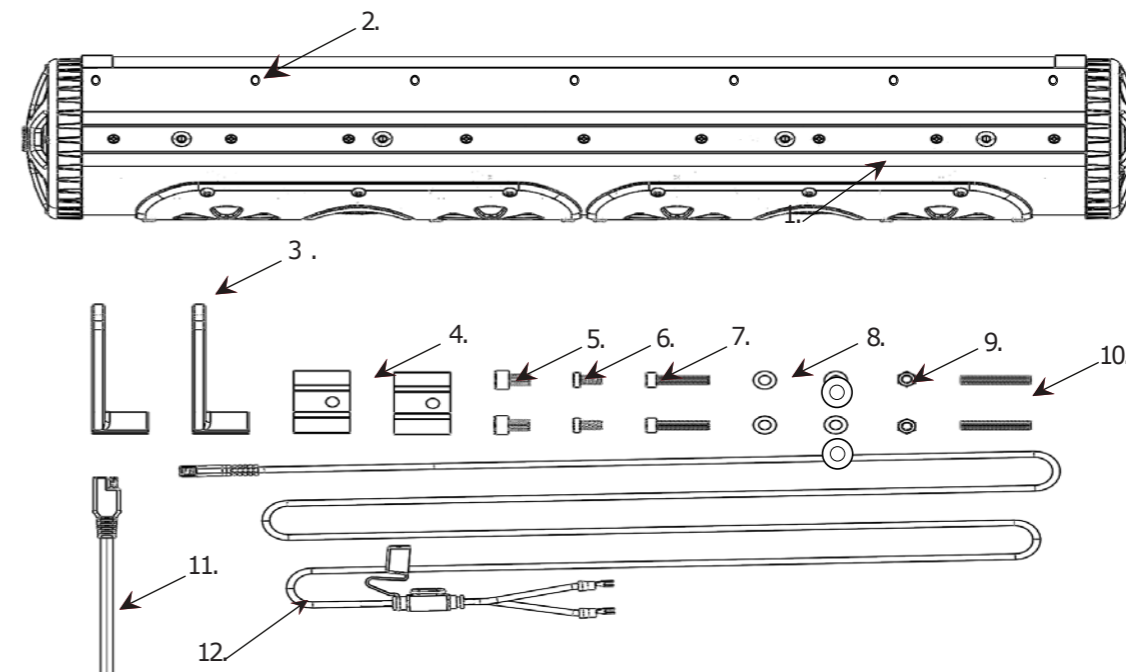

Integrated Mounting Rail Options

When using the Integrated Mounting Rail System, first determine your mounting stud spacing then screw the 6mm X 40mm studs (10) into the mounting nuts. Mark your desired spacing onto the flat surface to which you are mounting. Use a 1/4" or 7mm drill bit to drill mounting holes. Mount the Party Bar to your mounting surface using the 6mm washers (8) and 6mm nylon locking nuts (9) provided in hardware kit. You can also use our optional PR-URM, PR-FRC175, and PR-FRC200 clamps (sold separately) to mount to round tubing. When mounting the bottom half of the clamps to the Party Bar, you will need to use the 2 ea. 6mm X 12mm low profile socket head cap screws. (6)

BPB24 / BPB24-DS or BPB36 Installation Instructions

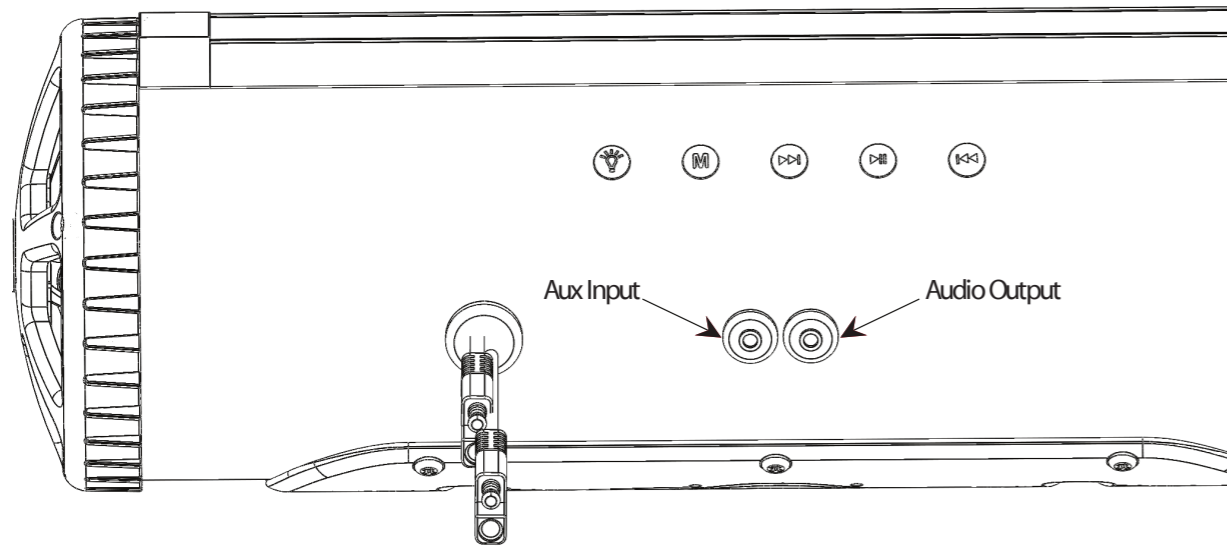

1. Party Bar (BPB24, BPB24-DS) 1 ea.
2. Integrated (Optional) Mounting Nuts 6mm 7 ea.
3. Mounting Leg 2 ea.
4. Rubber Vibration Insulation Pads 2 ea.
5. Socket Head Cap Screw 8mm X 16mm 2 ea.
6. Low Profile Socket Head Cap Screw 6mm X 16mm 2 ea.
7. Socket Head Cap Screw 6mm X 30mm 2 ea.
8. Washer 6mm - Narrow 2 ea., Wide 2 ea.
9. Nylon Insert Locking Nut 6mm 2 ea.
10. Stud 6mm x 40mm 2 ea.
11. Accessory Pigtail 1 ea.
12. Power Cable 6 ft. 1 ea.

IMPORTANT NOTICE:

The internal RF circuit for the remote control will draw a small amount of current because it must always be ON listening for the remote commands. Over time this could draw down your battery when your machine remains in storage without being connected to a charger or not being actively used. For this reason, we recommend connecting the Party Bar to a switched master power source or disconnecting the main power wire when the machine is in storage. We also make a plug & play inline 12v master power switch that can be easily added to the main battery wire for the Party Bar to completely kill power to the unit. It is listed under the Accessories tab on the Party Bar product page on our website (Model number: PR-ILS16)

Remove fuse from 6 ft power cable (12). Attach the red wire to the positive battery terminal. Attach the black wire to the negative battery terminal. Run power cable to the location of the BPB24, making sure power wire does not hinder the safe operation of the vehicle. Plug the red power cable end into the BPB24's red input power plug. The black 12vdc accessory plug can be used to power any 12vdc accessory up to 15 amps. Use the included black accessory pigtail (11) to wire your accessories.

- Button1** Auxiliary 12vdc output on/off switch.
- Button2** Press to power on. Press while power is on to switch input among AUX, Bluetooth and FM radio. Press and hold to power off.
- Button3** Press to go forward one track/station. Press and hold to increase volume.
- Button4** Press to play/pause. Press to answer/hang up phone. Double press for last number radial or open Siri on Iphone. Press and hold to unpair bluetooth device.
- Button5** Press to go back one track/station. Press and hold to decrease volume.

AUX Input Used for a 1/8" audio cable

Audio Output Used for line level audio signal output to an amplifier

Bluetooth module audio indicators:

Audio Response	Description
Power on:	Module is turned on
Power off:	Module is turned off
Beep:	After LED light stops blinking means module is paired
Beep:	When play/pause button is pressed and held means module is unpaired from Bluetooth device.
Double Beep:	When forward button is pressed and held means module has reached maximum volume.

LED light status indicator:

LED Light	Description
Blinking:	Bluetooth module is pairing
Solid Blue:	Bluetooth module is paired
Blue/Red:	AUX Input Mode
Fast Blinking:	FM Radio Mode

MUSIC FUNCTIONS

Press: Previous Song (FM Station)
Press & Hold: Volume Down

Press: Mode Select (AUX, Bluetooth, FM Radio)
Press & Hold: Power OFF
Press: (if OFF) Power ON*

Bluetooth Mode:

Press: Play/Pause (Phone Answer/Hang Up)
Press & Hold: Unpair current Bluetooth device, then enter pairing mode for new device.

FM Radio Mode:

Press: Auto Scan for stations available in the area.

AUX Mode:

Press: Mute Speaker

LED FUNCTIONS

- LEDs On/Off
- Speed Up
- Color Forward
- Color Back
- Mode Forward
- DEMO Mode
- Speed Down
- Mode Back
- Brightness Up
- Brightness Down

SWITCH FUNCTIONS

Switch aux. 12vdc (15 amp) output.

Remote switch buttons 2-4 are not used with this model

Note: * When pressing for Power Off, be sure to hold until Power Off is indicated (audible). Failure to do so may toggle the Bluetooth Receiver into AUX/BT Mode and it will remain in the last selected mode on subsequent Power On. If this occurs, simply press the M button again to reselect BT, AUX or FM mode as desired. The receiver should automatically pair with the last device in BT mode. To pair a new device, press and hold the Play/Pause button.
